Education

University of Toronto Toronto, ON, CA

BSc. Statistics Co-op, Minors in Computer Science, Geographic Information Systems *Sept. 2025 – Present*

- Relevant Courses: Calculus II, Intro to Computer Science II, Discrete Math, Linear Algebra I, Intro to Probability, GIS Principles and Applied Mapping

Experience

Education/Web Coordinator October 2025 – Present

UTSC Sports Business Association *Toronto, ON, CA*

- Developing a full-stack club website using Next.js, React, and Tailwind CSS
- Deploy and maintain the website, ensuring reliability, performance, and up-to-date content
- Collect and analyze sports and business data to research and write data-driven sports business articles
- Manage a database of dozens of email contacts for newsletter subscriptions and club updates

Web Designer June 2026 – August 2026

Muslim Welfare Canada *Toronto, ON, CA*

- Designed and maintained website layouts, pages, and templates
- Ensured consistent branding and visual standards across the website and all digital platforms
- Collaborated with front-end developers and internal teams on a website overhaul built in React
- Built, organized, and maintained a structured NAS server for the organization

Projects

GPS Bike Tracker | *Raspberry Pi, Linux, Python, SQL, React/Next.js* Aug. 2026 - Present

- Developed a Python-based GPS bike tracker on a Raspberry Pi, collecting real-time location, speed, distance, and trip data.
- Designed an offline-first SQLite data system that stores rides locally and synchronizes GPS data with a remote PostgreSQL database when Internet connectivity is available.
- Built a web-based interface with React/Next.js to access synchronized ride data, visualize routes, and analyze trip statistics.

Personal Portfolio | *React, Next.js, TypeScript, Tailwind CSS, Vercel, Git* Apr. 2026 - Present

- Developed my front-end skills by building a personal web portfolio built using React and Next.js
- Developed separate web components to create an organized layout for my website
- Combined various tools to create a smooth, user-friendly, animated experience

Interactive public transit maps | *HTML/CSS/JS, Adobe Illustrator, QGIS, PostgreSQL* Aug. 2025 - Apr. 2026

- Combined vector graphics, JavaScript, and web deployment to create functional transit maps of Toronto and Algiers
- Collected and mapped data using QGIS and PostgreSQL

FBRef Stats | *Python, requests, pandas, BS4, OOP, Matplotlib* 2024 - 2025

- Built a Python library which provides soccer statistics by scraping the internet using BeautifulSoup4 and requests
- Visualized and analyzed collected data using Matplotlib

Technical Skills

Competencies: Data Analysis/Visualization, Full-stack Web Development, GIS
Programming Languages/Tools: Python, C, HTML/CSS/JavaScript, TypeScript, Unity C#, PostgreSQL
Web Frameworks/Tools: Django, React, Next.js
Developer Tools: Git, Visual Studio, QGIS, ArcGIS Pro, Adobe Illustrator
Python Libraries: requests, json, BeautifulSoup4, pandas, Matplotlib
